PROFESSIONAL SUMMARY

M.S. Computer Science student at Texas Tech with 2 years of professional experience in Software engineering in Japan. Proven track record of delivering production-level, scalable ERP software solutions and actionable business solutions/insights for a semiconductor component manufacturer.

TECHNICAL SKILLS

- **Foundations:** Software Engineering, Statistical Analysis, Data Engineering, Data Analytics, Database, NoSQL, Web Scraping, Software Development Life Cycle, Product development, Machine Learning, GenAI
- **Programming:** Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), SQL, C#, JavaScript, HTML, CSS, R
- **Tools & Platforms:** Git/GitHub, Postman, Tableau, SQL Server Management Studio, Infor Cloud Suite Industrial (ERP Software), AWS, Apache Spark, Figma, Supabase, Dot Net, Docker, Kubernetes, Excel, Word, PowerPoint

EDUCATION

- **Texas Tech University** | TX Master of Science in Computer Science | *Expected Graduation: May 2027* | **GPA:** 3.428
 - **Tokyo International University** | Tokyo Bachelor of Science in Digital Business & Innovation (IT Specialization) | *Graduated: March 2024* | **GPA:** 3.37
 - **Awards:** JASSO Scholarship Recipient (2021, 2023)
- Relevant Coursework:** Database Management Systems, Software Project Management, Big Data & Analytics, Intelligent Systems, Reinforcement Learning, Advanced Operating Systems Design, Statistics, R Programming, Computer Organization & Architecture

PROFESSIONAL EXPERIENCE

- **TECDIA Co. Ltd.** | Japan (Semiconductor Manufacturer) **Software Engineer** | *September 2023 – August 2025*
 - **Data Automation:** Implemented automated data synchronization using **SQL Server stored procedures and triggers** to integrate manufacturing and sales modules within an **ERP system**, improving data consistency and reducing manual data entry across operational workflows.
 - **System Integration:** Developed backend services using **C# and VB.NET (Dot Net Framework)** to integrate **RESTful APIs** with external logistics platforms such as **FedEx**, enabling automated shipment processing and centralized shipping data management.
 - **Database Design & Optimization:** Designed and optimized **relational database schemas, indexing strategies, and query performance in SQL Server**, supporting high-integrity data operations across Finance, Sales, and Manufacturing departments.
 - **Data Analytics & Reporting:** Utilized **Python and SQL** to perform **data analysis, reporting, and data transformation**, enabling business teams to extract insights from operational datasets and improve data-driven decision-making.
 - **SDLC Management:** Managed the full Software Development Life Cycle for internal ERP features, from gathering stakeholder requirements to final deployment and technical documentation.

KEY PROJECTS

- **Full-Stack E-Learning Platform** | *HTML, CSS, JS, Node.js, MySQL*
Developed and deployed an eLearning Web platform, converting complex requirements into modular backend workflows and core relational data models. Orchestrated the end-to-end development and **live deployment** of the platform securely. Integrated a MySQL backend for structured user activity logging, with a vision to implement AI-powered diagnostic reporting for personalized feedback.
- **Data Analysis & Visualization for a Business Performance Analysis** | *Python, Excel, Tableau*
Utilized Python to perform advanced data cleaning and imputation on complex raw datasets, preparing them for analytical processing. Created interactive data visualizations/dashboards in Tableau, Python, and Excel to identify business trends and performance.
- **Other Projects:** Pendulum Balancing Reinforcement Learning, Personal Portfolio Website, Web Project for Local Shop, Productivity App (MacOS/Windows), Text Analysis using Python, Research (Details on [GitHub](#))

LANGUAGES

- English (Fluent), Japanese (Business), Hindi (Fluent), Nepali
